FOOD AND DRUG ADMINISTRATION CENTER FOR DRUGS AND BIOLOGICS APPROVED DRUG PRODUCTS

with Therapeutic Equivalence Evaluations

PREFACE TO SEVENTH EDITION

The Approved Drug Products with Therapeutic Equivalence Evaluations publication (the List) identifies currently marketed drug products approved on the basis of safety and effectiveness by the Food and Drug Administration (FDA) under the Federal Food, Drug, and Cosmetic Act (Act). The main criterion for the inclusion of any product is that the product is the subject of an approved application. In addition, the List contains therapeutic equivalence evaluations for approved multisource prescription drug products. Further, inclusion of products on the List is independent of any current regulatory action through administrative or legal means against a drug product. These evaluations have been prepared to serve as public information and advice to State health agencies and pharmacists in the administration of drug product selection laws, to promote public education in the area of drug product selection and to foster containment of health costs. Therapeutic equivalence evaluations in this publication do not imply any FDA regulatory requirements or restrictions.

In order to contain drug costs, virtually all States have adopted laws that encourage or mandate the substitution of drug products. These State laws generally require either that substitution be limited to drugs on a specific list (the positive formulary approach) or that it be permitted for all drugs except those prohibited by a particular list (the negative formulary approach).

Because of numerous requests for FDA assistance in preparing both positive and negative formularies, it became apparent that FDA could not serve the needs of each State on an individual basis. The Agency also recognized that providing a single list based on common policies would be preferable to evaluating drug products on the basis of differing definitions and criteria in various State laws. As a result, on May 31, 1978, the Commissioner of Food and Drugs sent a letter to officials of all States stating FDA's intention to provide a list of all prescription drug products that are approved by FDA for safety and effectiveness, along with therapeutic equivalence determinations, for multisource products.

The List was distributed as a proposal in January 1979, and included only currently marketed prescription drug products approved by FDA through new drug applications (NDAs) or abbreviated new drug applications (ANDAs) under the provisions of Section 505 or 507 of the Act.

The therapeutic equivalence evaluations in the List reflect FDA's application of specific criteria to the approved multisource prescription drug products on the List. These evaluations are presented in the form of code letters that indicate the basis for the evaluation made. An explanation of the code appears in the *Introduction*.

A complete discussion of the background and basis of FDA's therapeutic equivalence evaluation policy was published in the *Federal Register* on January 12, 1979 (44 FR 2932). The final rule, which includes FDA's responses to the public comments on the proposal, was published in the *Federal Register* on October 31, 1980 (45 FR 72582). The first publication, October 1980, of the final version of the List incorporated appropriate corrections and additions. Each subsequent edition has included the latest approvals and data changes.

On September 24, 1984, the President signed into law the Drug Price Competition and Patent Term Restoration Act (1984 Amendments). The 1984 Amendments require that FDA, among other things, make publicly available a list of approved drug products with monthly supplements. The Approved Drug Products with Therapeutic Equivalence Evaluations publication and its monthly Cumulative Supplements satisfy this requirement. The Addendum to this publication identifies drugs which qualify under the 1984 Amendments for periods of exclusivity (during which Abbreviated New Drug Applications for those drugs may either not be submitted or made effective by the Agency) and provides patent information concerning the listed drugs. The Addendum also provides additional information that may be helpful to those submitting a new drug application to the Agency.

Because this List is now statutorily mandated, and because regulations are not yet in place to implement the 1984 Amendments, the Agency intends to use this publication to further its objective of obtaining input and comment on the publication itself and related Agency procedures. Therefore, if you have comments on how the publication can be improved, please send your comments to, Director, Division of Drug Information Resources, Center for Drugs and Biologics, HFN-80, 5600 Fishers Lane, Rockville, MD 20857.

1. INTRODUCTION

1.1 Content and Exclusion

The List is composed of three parts: approved prescription drug products with therapeutic equivalence evaluations, over-the-counter (OTC) drug products that require approved applications as a condition of marketing, and drug products approved by the Division of Blood and Blood Products under Section 505 of the Act. This publication also includes indices of prescription and OTC drug products by trade or established name and by applicant name (holder of the approved application), and a list of applicants' abbreviated name designations. In addition, a list of uniform terms is provided. An Addendum contains appropriate drug patent and exclusivity information for the Prescription, OTC, and Drug Products Approved Under Section 505 of the Act by the Division of Blood and Blood Products lists.

Prior to the 6th Edition, the publication had excluded OTC drug products and drug products approved in the Division of Blood and Blood Products, because the main purpose of the publication was to provide information to States regarding FDA's recommendation as to which generic prescription drug products were acceptable candidates for drug product selection. With the passage of the 1984 Amendments, the Agency now has the responsibility to publish an up-to-date list of all marketed drug products, OTC as well as prescription, that have been approved for safety and efficacy and for which new drug applications are required. There are some drugs for which there are both approved and unapproved OTC drug products in the market place. This situation occurs as a result of the Agency's current OTC compliance policy which allows the marketing of various unapproved OTC drug products pending the effective date of the applicable final OTC monograph. The products included in the OTC Drug Product list are limited to those for which approved applications are currently required as a condition of marketing.

As a general rule, the distributors of the products on the List are not identified. Because there is no requirement to immediately notify FDA when distributors shift their source of supply, it is not possible to maintain up-to-date and complete information linking the products of approved applications with distributors and relabelers handling those products.

1.2 Therapeutic Equivalence-Related Terms

Pharmaceutical Equivalents. Drug products are considered to be pharmaceutical equivalents if they contain the same active ingredients and are identical in strength or concentration, dosage form, and route of adminis-

tration (e.g., chlordiazepoxide hydrochloride, 5mg oral capsules). Pharmaceutically equivalent drug products are formulated to contain the same amount of active ingredient in the same dosage form and to meet the same or comparable standards (i.e., strength, quality, purity, and identity), but they may differ in characteristics such as color, flavor, shape, packaging, preservatives, expiration time, and, within certain limits, labeling.

Pharmaceutical Alternatives. Drug products are considered to be pharmaceutical alternatives if they contain the same therapeutic moiety, but differ in the salt or ester of that moiety or in the dosage form or strength (e.g., tetracycline hydrochloride, 250mg capsules vs. tetracycline phosphate complex, 250mg capsules; quinine sulfate, 200mg tablets, vs. quinidine sulfate, 200mg capsules). Different dosage forms and strengths within a product line by a single manufacturer are thus pharmaceutical alternatives, as are controlled-release products when compared with conventional formulations of the same active ingredient.

Therapeutic Equivalents. Drug products considered to be therapeutic equivalents are pharmaceutical equivalents that can be expected to have the same therapeutic effect when administered to patients under the conditions specified in the labeling. The concept of therapeutic equivalence, as used to develop the List, applies only to products containing the same active ingredients and does not encompass a comparison of different therapeutic agents used for the same condition (e.g., propoxyphene hydrochloride vs. pentazocine hydrochloride for the treatment of pain).

FDA evaluates as therapeutically equivalent those products that meet the following general criteria: (1) they are pharmaceutical equivalents in that they (a) contain identical amounts of the same active drug ingredient in the same dosage form, and (b) meet compendial or other applicable standards of strength, quality, purity, and identity; (2) they are bioequivalent in that (a) they do not present a known or potential bioequivalence problem, or (b) if they do present such a known or potential problem, they are shown to meet an appropriate bioequivalence standard; (3) they are adequately labeled; and (4) they are manufactured in compliance with Current Good Manufacturing Practice regulations.

FDA considers drug products to be therapeutically equivalent if they meet the criteria outlined above, even though they may differ in certain other characteristics (e.g., color, flavor, packaging, preservatives, expiration date) and minor aspects of labeling (e.g., the presence of a specific indication). When such differences are important in the care of a particular patient, it is ap-

appropriate for the prescribing physician to require that a particular brand be dispensed as a medical necessity. As long as this consideration is met, however, FDA believes that products considered therapeutically equivalent can be substituted with the full expectation that the substituted product will produce the same therapeutic effect as the prescribed product.

Bioavailability. This term describes the rate and extent to which the active drug ingredient or therapeutic ingredient is absorbed from a drug product.

Bioequivalent Drug Products. This term describes pharmaceutically equivalent products which display comparable bioavailability when studied under similar experimental conditions. Section 505 (j)(7)(B) of the Act describes conditions under which a test and reference (listed) drug will be considered bioequivalent:

the rate and extent of absorption of the test drug do not show a significant difference from the rate and extent of absorption of the reference drug when administered at the same molar dose of the therapeutic ingredient under similar experimental conditions in either a single dose or multiple doses; or

the extent of absorption of the test drug does not show a significant difference from the extent of absorption of the reference drug when administered at the same molar dose of the therapeutic ingredient under similar experimental conditions in either a single dose or multiple doses and the difference from the reference drug in the rate of absorption of the drug is intentional, is reflected in its proposed labeling, is not essential to the attainment of effective body drug concentrations on chronic use, and is considered medically insignificant for the drug.

Bioequivalence may sometimes be demonstrated using an *in vitro* bioequivalence standard, especially when such an *in vitro* test has been correlated with human *in vivo* bioavailability data.

1.3 General Policies and Legal Status

The List contains public information and advice. It does not mandate which drug products persons should purchase, prescribe, dispense, or, conversely, which products should be avoided. To the extent that the List identifies drug products approved for marketing under Section 505 or 507 of the Act, it merely sets forth information which the Agency is required to publish and which the public is entitled to under the Freedom of Information Act. Exclusion of a drug product from the List does not necessarily mean that the drug product is in violation of Section 505 or 507 of the Act, or that it is not safe or effective, or that it may not be therapeutic

equivalent to other drug products. Rather, the exclusion is based on the fact that FDA has not evaluated the safety, effectiveness, and quality of the drug product. To the extent that the List sets forth FDA's evaluations of the therapeutic equivalence of drug products that have been approved, it contains FDA's advice to the public and to the States regarding an important public health matter. These evaluations do not constitute determinations that any products are in violation of the Act or that any products are preferable to others.

1.4 Practitioner's Responsibilities

Professional care and judgment should be exercised in using the List. Evaluations of therapeutic equivalence for prescription drugs are based on scientific and medical evaluations by FDA. Products evaluated as therapeutically equivalent can be expected, in the judgment of the FDA, to have equivalent therapeutic effect and no greater potential for adverse effects when used under the conditions of their labeling. However, these products may differ in other characteristics such as color, flavor, shape, packaging, preservatives, expiration date, and, in some instances, labeling. If products with such differences are substituted for each other, there is a potential for patient confusion due to differences in color or shape of tablets, less patient acceptance of certain products because of flavor, better stability of one product over another under adverse conditions of storage, allergic reactions in rare cases due to a coloring or a preservative ingredient, as well as differences in cost to the patient. An FDA evaluation of therapeutic equivalence in no way relieves practitioners of their professional responsibilities in prescribing and dispensing such products with due care and with appropriate information to individual patients. In those uncommon circumstances where the characteristics of a specific product, other than its active ingredient, are important in the therapy of a particular patient, the physician's specification of that product is appropriate. Pharmacists must also be familiar with the expiration dates and labeling conditions for storage, particularly for reconstituted products, to assure that patients are properly advised when one product is substituted for another.

Multisource and single-source drug products. FDA has evaluated for therapeutic equivalence only multisource prescription drug products, which in virtually all instances means those pharmaceutical equivalents available from more than one manufacturer. For such products, a therapeutic equivalence code is included and, in addition, product information is highlighted in bold face and underlined. Those products with approved applications that are single-source (i.e., there is only one approved product available for that active ingredient

and dosage form) are also included on the List, but no therapeutic equivalence code is included with such products. The details of these codes and the policies underlying them are discussed in Section 1.5.

When FDA is aware of new information concerning a multisource prescription drug product that causes its therapeutic equivalence evaluation to change, the designation will be changed in the next monthly Cumulative Supplement.

Products on the List are identified by the names of the holders of approved applications (applicants), rather than by the names of the actual manufacturers themselves. This is because the applicant may have had its product manufactured by a contract manufacturer and may simply be distributing the product for which it has obtained approval. In most instances, however, the manufacturer of the product is the applicant.

Although the products on the List are identified by the names of the applicants, circumstances, such as changing corporate ownership, have made this determination a difficult one. The Agency believes that, based on intensive and continuing document reviews and on concurrence through communication with firms, the applicant designations on the List, in most cases, are correct.

In order to relate firm and product identity information on a product label to that on the List, the following should be noted: If the applicant (firm name in the NDA) is the marketer (firm name on the label), their name appears on the List; if the applicant is not the marketer, and the Agency is aware of a corporate relationship between the applicant and the marketer, the name of the marketer and the trade name (proprietary name) of the drug product (established name if no trade name exists) appear on the List; if the applicant is not the marketer, and the Agency is unaware of a corporate relationship, the applicant's name and the established name appear on the List.

As a general rule, the products on the List are not identified by distributors' names. Products subject to an approved application are frequently manufactured for marketing by distributors under their own labeling. Even if FDA were to attempt to expand the List to link distributors with applicants, FDA would not have ready access to the necessary information. This is because there is no requirement that an applicant notify FDA when distributors shift their source of supply in the commercial marketplace. However, many distributors' labeling includes the name of the manufacturer of the product. The manufacturer's name often is the holder of the application and, hence, would appear on the List.

Every product on the List is subject at all times to regulatory action. From time to time, approved products may be found in violation of one or more provisions of the Act. In such circumstances, the Agency

will commence appropriate enforcement action to correct the violation, if necessary, by removing the product from the market by voluntary recall, seizure, or other enforcement actions. Such regulatory actions are, however, independent of the inclusion of a product on the List. The sole criterion for inclusion of a product is its being the subject of an approved application that has not been withdrawn for safety or efficacy reasons. FDA believes that retention of a violative product on the List will not have any significant adverse health consequences, because other legal mechanisms are available to the Agency to prevent its actual marketing.

1.5 Therapeutic Equivalence Evaluations Codes

The two-letter coding system for therapeutic equivalence evaluations is constructed to allow users to determine quickly whether the Agency has evaluated a particular approved product as therapeutically equivalent to other pharmaceutically equivalent products (first letter) and to provide additional information on the basis of FDA's evaluations (second letter).

The two basic classification categories into which multisource drugs have been placed are indicated by the first letter as follows:

A—Drug products that FDA considers to be therapeutically equivalent to other pharmaceutically equivalent products, i.e., drug products for which:

- (1) there are no known or suspected bioequivalence problems. These are designated **AA, AN, AO, AP, or AT**, depending on the dosage form; or
- (2) actual or potential bioequivalence problems have been resolved with adequate *in vivo* and/or *in vitro* evidence supporting bioequivalence. These are designated **AB**.

B—Drug products that FDA does not at this time consider to be therapeutically equivalent to other pharmaceutically equivalent products, i.e.,

drug products for which actual or potential bioequivalence problems have not been resolved by adequate evidence of bioequivalence. Often the problem is among specific dosage forms rather than with the active ingredients. These are designated **BC, BD, BE, BN, BP, BR, BS, BT, or BX**.

Individual drug products have been evaluated as therapeutically equivalent in accordance with the definitions and policies outlined below:

"A" CODES

Drug products that are considered to be therapeutically equivalent to other pharmaceutically equivalent products.

Drug products designated with an "A" code fall under one of two main policies:

- (1) for those active ingredients for which no bioequivalence issue is known or suspected, the therapeutic equivalence of pharmaceutically equivalent products is presumed, so long as the products are manufactured in accordance with Current Good Manufacturing Practice regulations and meet the other requirements of their approved applications (these are designated **AA**, **AN**, **AO**, **AP**, or **AT**, depending on the dosage form, as described below); and
- (2) for those DESI drug products containing active ingredients which have been identified by FDA as having actual or potential bioequivalence problems [21 CFR 320.22 or January 7, 1977 (42 FR 1648); revised July 14, 1981] and for post-1962 drug products, an evaluation of therapeutic equivalence is assigned to pharmaceutical equivalents only if the approved application contains adequate scientific evidence supporting the bioequivalence of the product to a selected standard product. This evidence may be an *in vivo* bioavailability study or an *in vitro* dissolution rate study or both, depending upon the drug. These products are designated **AB**.

There are some general principles which may affect the substitution of pharmaceutically equivalent products in specific cases. Prescribers and dispensers of drugs should be alert to these principles so as to deal appropriately with situations which require professional judgment and discretion.

There may be labeling differences among pharmaceutically equivalent products which require attention on the part of the health professional. For example, pharmaceutically equivalent powders to be reconstituted for administration as oral or injectable liquids may vary with respect to their expiration time or storage conditions after reconstitution. An FDA evaluation that such products are therapeutically equivalent is applicable only when such products are reconstituted, stored, and

used under the conditions specified in the labeling of each product.

Occasionally there may be variations among pharmaceutically equivalent products in their use or labeling instructions on the conditions of administration. For example, a particular brand of an antibiotic might require administration on an empty stomach, while another brand might permit administration without regard to food intake on the basis of blood level studies done after administration in the presence of food. An FDA evaluation of therapeutic equivalence in such cases is applicable only when such products are taken in accordance with labeling directions.

In some cases, closely related products are listed as containing the same active ingredients, but in somewhat different amounts. In determining which of these products are pharmaceutically equivalent, the Agency has employed a criterion that products with labeled strengths of an ingredient that do not vary by more than 1% will be considered pharmaceutically equivalent.

Different salts and esters of the same therapeutic moiety are regarded as pharmaceutical alternatives. Such products are not considered to be therapeutically equivalent. There are no instances in this List where pharmaceutical alternatives are coded as therapeutically equivalent. Anhydrous and hydrated entities are not considered as pharmaceutical equivalents unless they meet the same standards and, as in the case of ampicillin, their equivalence is supported by appropriate bioavailability/bioequivalence studies where necessary.

No codes in this book are intended to preclude Health Care Professionals from converting pharmaceutically different concentrations into pharmaceutical equivalents using accepted professional practice.

Where package size variations have therapeutic implications, products so packaged have not been considered pharmaceutically equivalent. For example, some oral contraceptives are supplied in 21-tablet and 28-tablet packets; the 28-tablet packets contain 7 placebo or iron tablets. These two packaging configurations are not regarded as pharmaceutically equivalent; thus, they are not designated as therapeutically equivalent.

Preservatives may differ among some therapeutically equivalent drug products. FDA's evaluations of therapeutic equivalence do not consider preservatives or other inactive ingredients unless these components affect bioequivalence.

The specific sub-codes for those drugs evaluated as therapeutically equivalent and the policies underlying these follow:

AA

Products not presenting bioequivalence problems in conventional dosage forms

Products coded as **AA** contain active ingredients and dosage forms that are not regarded as presenting either actual or potential bioequivalence problems or drug quality or standards issues. However, all solid oral dosage forms must meet an appropriate *in vitro* test for approval.

AB

Products meeting necessary bioequivalence requirements

The **AB** evaluation denotes products that: (1) contain an active ingredient in a dosage form for which the submission of bioavailability or clinical data is required for approval or to permit therapeutic equivalence evaluations, and (2) for which the applicant has provided adequate studies to establish the bioavailability and bioequivalence of its product. Products will be coded **AB** if a study is submitted demonstrating bioequivalence, even if the study currently is not required for approval. This category also includes those few drugs with more than one approved application but only one manufacturer. It should be noted that if only one product under a drug ingredient heading is coded **AB**, it signifies that only that product is supported by bioavailability data. It does not signify that this product is therapeutically equivalent to the other drugs under the same heading. Thus, one product under a drug ingredient heading, coded **AB**, is not therapeutically equivalent to a drug product under the same heading that is coded **BD**, **BP**, or **BT**. Drugs coded **AB** under an ingredient heading are considered therapeutically equivalent only to other drugs coded **AB** under that heading.

AN

Solutions and powders for aerosolization

Uncertainty regarding the therapeutic equivalence of aerosolized products arises primarily because of differences in the drug delivery system. Powders or solutions for aerosolization which are marketed for use in any of several delivery systems are considered to be pharmaceutically and therapeutically equivalent and are coded **AN**. Those products that are compatible only with a specific delivery system or those products which are a component of a specific delivery system are classified **BN**, because drug products in their respective delivery systems are not necessarily pharmaceutically equivalent to each other; and, therefore not therapeutically equivalent.

AO

Injectable oil solutions

The absorption of drugs in injectable (parenteral) oil solutions may vary substantially with the type of oil employed as a vehicle and the concentration of the active ingredient. Injectable oil solutions are therefore considered to be pharmaceutically and therapeutically equivalent only when the active ingredient, its concentration, and the type of oil used as a vehicle all are identical.

AP

Injectable aqueous solutions

It should be noted that even though injectable (parenteral) products under a specific listing may be evaluated as therapeutically equivalent, there may be important differences among the products in the general category, *Injectable; Injection*. For example, some injectable products that are rated therapeutically equivalent are labeled for different routes of administration. In addition, some products evaluated as therapeutically equivalent may have different preservatives or no preservatives at all. Injectable products available as dry powders for reconstitution, concentrated sterile solutions for dilution, or sterile solutions ready for injection, are all considered to be pharmaceutically and therapeutically equivalent provided they are designed to produce the same concentration for injection and are similarly labeled. Consistent with accepted professional practice, it is the responsibility of the prescriber, dispenser, or individual administering the product to be familiar with a product's labeling to assure that it is given only by the route(s) of administration stated in the labeling.

Certain commonly used large volume intravenous products in glass containers are not included on the List (e.g., dextrose injection 5%, dextrose injection 10%, sodium chloride injection 0.9%). Virtually all of these products first came on the market before 1938 and have not been required to obtain an approved NDA as a condition of marketing. When packaged in plastic containers, however, these same products are considered to be new drugs requiring approved NDAs for marketing. Approval then depends on, among other things, the extent of the available safety data involving the specific plastic component of the product. All large volume parenteral products are manufactured under similar standards, regardless of whether they

are packaged in glass or plastic. Thus, FDA has no reason to believe that the packaging container of large volume parenteral drug products that are pharmaceutically equivalent would have any effect on their therapeutic equivalence.

AT

Topical products

There are a variety of topical dosage forms available for dermatologic, ophthalmic, otic, rectal, and vaginal administration, including solutions, creams, ointments, gels, lotions, pastes, sprays, and suppositories. Even though different topical dosage forms may contain the same active ingredient and potency, these dosage forms are not considered pharmaceutically equivalent. Therefore, they are not considered therapeutically equivalent. In the absence of contrary data, all DESI drug products containing the same active ingredient in the same topical dosage form are considered therapeutically equivalent if they are pharmaceutically equivalent. However, applicants for approval of post-1962 topical drug products either demonstrate the safety and efficacy of their product through clinical trials or through a bioequivalence study in order to be evaluated as therapeutically equivalent. Pharmaceutically equivalent topical products which raise questions of bioequivalence are coded **AB** when supported by adequate bioavailability data and **BT** in the absence of such data.

"B" CODES

Drug products that FDA does not at this time consider to be therapeutically equivalent to other pharmaceutically equivalent products.

Drug products designated with a "B" code fall under one of two main policies:

- (1) the drug products contain active ingredients or are manufactured in dosage forms that have been identified by the Agency as having documented bioequivalence problems or a significant potential for such problems and for which no adequate studies demonstrating bioequivalence have been submitted to FDA; and
- (2) the quality standards are inadequate or FDA has an insufficient basis to determine therapeutic equivalence.

The specific coding definitions and policies for the "B" sub-codes are as follows:

BC

Controlled-release tablets, controlled-release capsules, and controlled-release injectables

Although bioavailability studies have been conducted on these dosage forms, they are subject to bioavailability differences, primarily because firms developing controlled-release products for the same active ingredient rarely employ the same formulation approach. FDA, therefore, does not evaluate different controlled-release dosage forms containing the same active ingredient in equal strength as bioequivalent unless equivalence between individual products has been specifically demonstrated through appropriate bioequivalence studies. Controlled-release products for which acceptable bioequivalence data are available have been coded **AB**.

BD

Active ingredients and dosage forms with documented bioequivalence problems

The **BD** code denotes products containing active ingredients with known bioequivalence problems and for which adequate studies have not been submitted to FDA demonstrating bioequivalence. Where such studies have been submitted, the product has been coded **AB**.

BE

Enteric-coated oral dosage forms

Drug products in enteric-coated dosage forms containing the same active ingredients are subject to significant differences in absorption. In general, such products cannot be considered pharmaceutically equivalent, because they do not necessarily meet similar standards, and few manufacturers of enteric-coated products have studied the pharmacokinetics of their products. Unless otherwise specifically noted, the Agency does not consider different enteric-coated products containing the same active ingredients as bioequivalent. If studies have demonstrated the bioequivalence of specific enteric-coated products, such products are coded **AB**.

BN

Products in aerosol-nebulizer drug delivery systems

This code applies to drug solutions or powders that are marketed only as a component of or are compatible with a specific drug delivery system. For example, there may be significant differences in the dose of drug and particle size delivered by different products of this type. Therefore, such products are not regarded as pharmaceutically equivalent.

BP

Active ingredients and dosage forms with potential bioequivalence problems

FDA's bioequivalence regulations (21 CFR 320.52) contain criteria and procedures for determining whether a specific active ingredient in a specific dosage form has a potential for causing a bioequivalence problem. It is FDA's policy to consider an ingredient meeting these criteria as having a potential bioequivalence problem even in the absence of positive data demonstrating inequivalence. Pharmaceutically equivalent products containing these ingredients in oral dosage forms are included in this category pending resolution of the problem.

Injectable suspensions containing an active ingredient suspended in an aqueous or oleaginous vehicle have also been included in this subcategory. Injectable suspensions are subject to bioequivalence problems, because differences in particle size, polymorphic structure of the suspended active ingredient, or the suspension formulation can significantly affect the rate of release and absorption. FDA does not consider pharmaceutical equivalents of these products as being bioequivalent without adequate evidence of bioequivalence.

BR

Suppositories or enemas for systemic use

The absorption of active ingredients from suppositories or enemas that are intended to have a systemic effect (as contrasted with suppositories administered for local effect) can vary significantly from product to product. Therefore, FDA considers pharmaceutically equivalent systemic suppositories or enemas as bioequivalent only if positive evidence of bioequivalence is available. In those cases where positive evidence is available, the product is coded **AB**. If such evidence is not available, the products are coded **BR**.

BS

Products having drug standard deficiencies

If the drug standards for an active ingredient in a particular dosage form are found by FDA to be deficient so as to prevent an FDA evaluation of either pharmaceutical or therapeutic equivalence, all drug products containing that active ingredient in that dosage form are coded **BS**. For example, if the standards permit a wide variation in pharmacologically active components of the active ingredient such that pharmaceutical equivalence is in question, all products containing that active ingredient in that dosage form are coded **BS**.

BT

Topical products with bioequivalence issues

This code applies mainly to post-1962 dermatologic, ophthalmic, otic, rectal, and vaginal products for topical administration, including creams, ointments, gels, lotions, pastes, and sprays, as well as suppositories not intended for systemic drug absorption. Topical products evaluated as having acceptable performance, but which are not bioequivalent to other pharmaceutically equivalent products or those lacking sufficient evidence of bioequivalence will be coded **BT**.

BX

Insufficient data

The code **BX** is assigned to specific drug products for which the Agency has insufficient data to determine therapeutic equivalence under the policies stated in this document. In these situations, the drug products are presumed to be therapeutically inequivalent until adequate information becomes available to make a full evaluation of therapeutic equivalence.

1.6 Description of Special Situations

Certain drugs present special situations that deserve a more complete explanation than can be provided by the two-letter codes used in the List. These drugs have particular problems with standards of identity, analytical methodology, or bioequivalence issues that are in the process of resolution. The following are in this category:

Erythromycin Stearate Tablets. All manufacturers of erythromycin stearate tablet products demonstrated product bioequivalency as a condition of application approval. These bioequivalence studies were performed under fasting conditions, and, as a result, all firms were required to label their products to be taken on an empty stomach. Since that time, some firms have demonstrated that their products may be taken immediately before meals, but not with meals, and still achieve acceptable blood levels. On the basis of such studies, FDA has approved those products to be labeled accordingly. At the same time, the Agency stresses that optimal absorption for any erythromycin stearate tablet is achieved when the drug is administered under fasting conditions and recommends that prescriptions include instructions regarding administration in relation to meals. When erythromycin stearate tablets are to be administered under fasting conditions, the Agency believes that any listed product coded **AB** may be considered therapeutically equivalent. If erythromycin stearate is to be taken immediately before meals, only those products with labeling that provides for such administration should be dispensed. Erythromycin stearate tablet products have been designated therapeutically equivalent (**AB**) in the List, because all of the products produce equivalent blood levels provided the drug is prescribed and administered in accordance with the conditions of use in the labeling. Prescribers and dispensers are advised to be familiar with the labeling of these products.

Amino Acid and Protein Hydrolysate Injections. These products differ by the amount and kinds of amino acids they contain and, therefore, they are not considered pharmaceutical equivalents. It is on this basis that FDA cannot evaluate these products as therapeutic equivalents. At the same time, the Agency believes that it is appropriate to point out that where nitrogen balance is the sole therapeutic objective and individual amino acid content is not a consideration, pharmaceutical alternative products with the same total amount of nitrogen content may be considered as therapeutically equivalent.

Theophylline. Recent studies suggest that food may significantly alter the absorption of theophylline from some controlled-release theophylline drug products. Current research is defining more precisely the relationship between the timing of meals (including type and amount of food) and the rate and extent of absorption of theophylline from the controlled-release dosage form. Specific product labeling should be consulted to determine the information available on this subject.

Three controlled-release theophylline tablets are listed as therapeutically equivalent (**AB**). Because Theo-dur® is approved for both once-daily and twice-daily dosing, it is important to be aware that the therapeutic equivalence evaluation was made on the basis of 12-hour dosing intervals. Therefore, this evaluation does not apply to once-daily dosing intervals. To date, no data have been submitted upon which the Agency can base a therapeutic equivalence determination for once-daily dosing.

1.7 Availability of the Publication and Updating Procedures

FDA provides monthly Cumulative Supplements to each annual edition, furnishing, among other things, new drug approval information and, if necessary, revised therapeutic equivalence evaluations and updated patent and exclusivity data. Since all parts of this publication are subject to changes, additions, or deletions, the List must be used in conjunction with the most current Cumulative Supplement.

An updated magnetic tape containing the Prescription Drug Product list, the OTC Drug Product list, the Drug Products Approved Under Section 505 of the Act by the Division of Blood and Blood Products list, and the Patent and Exclusivity Information Addendum is available quarterly by subscription from the U.S. Department of Commerce, National Technical Information Service, Springfield, VA 22161.

2. HOW TO USE THE DRUG PRODUCT LISTS

2.1 Key Sections for Using the Drug Product Lists

This publication contains the Drug Product Lists, along with illustrations, indices, and lists of abbreviations and terms which facilitate their use.

Drug Product Lists. The Drug Product Lists, arranged alphabetically by active ingredient, contain product identification information (active ingredients, dosage forms, routes of administration, product names, applicants, strengths) for single and multiple ingredient drug products. Also shown is the application number and product number (FDA's file numbers) and approval dates for those products approved January 1, 1982, and thereafter.

If a prescription product is available from more than one source (multisource), a therapeutic equivalence code will appear in front of the applicant's name. If a product is therapeutically equivalent to one or more products or to an appropriate reference, it will be designated with a code beginning with "A" and the entry will be underlined and printed in bold font for emphasis.

Active ingredients in multiple ingredient (combination) products are arranged alphabetically. For example, product information for the product labeled methyl dopa and chlorothiazide appears listed under *Chlorothiazide; Methyl dopa*. A cross-reference to the product information (for prescription and OTC products) appears for each additional active ingredient in the product. For combination products, the ingredient strengths are separated by semicolons and appear in the same relative sequence as the ingredients in the heading. Available strengths of the dosage form from an applicant appear on separate lines.

To use the Drug Product Lists, determine by alphabetical order the ingredient under which the product information is listed, using the Product Name Index if

appropriate. Then, find the ingredient in the applicable Drug Product List. Proceed to the dosage form and route of administration and compare products within that ingredient heading only. Therapeutic equivalence or inequivalence for prescription products is determined on the basis of the therapeutic equivalence codes provided within that specific dosage form heading.

Illustrations. The annotated "Drug Product Illustration" and "Therapeutic Equivalence Evaluations Illustration" are offered to provide further clarification. These depict the format found in the Prescription Drug Product list (the only list in which therapeutic equivalence evaluation codes are found). The OTC and the Drug Products Approved Under Section 505 of the Act by the Division of Blood and Blood Products lists have their data arranged similarly.

Product Name Index (Prescription and OTC Drug Product Lists). This is an index of products by established or trade name. The second term of each entry indicates the ingredient under which product information can be found in the appropriate Drug Product List. OTC products are so designated.

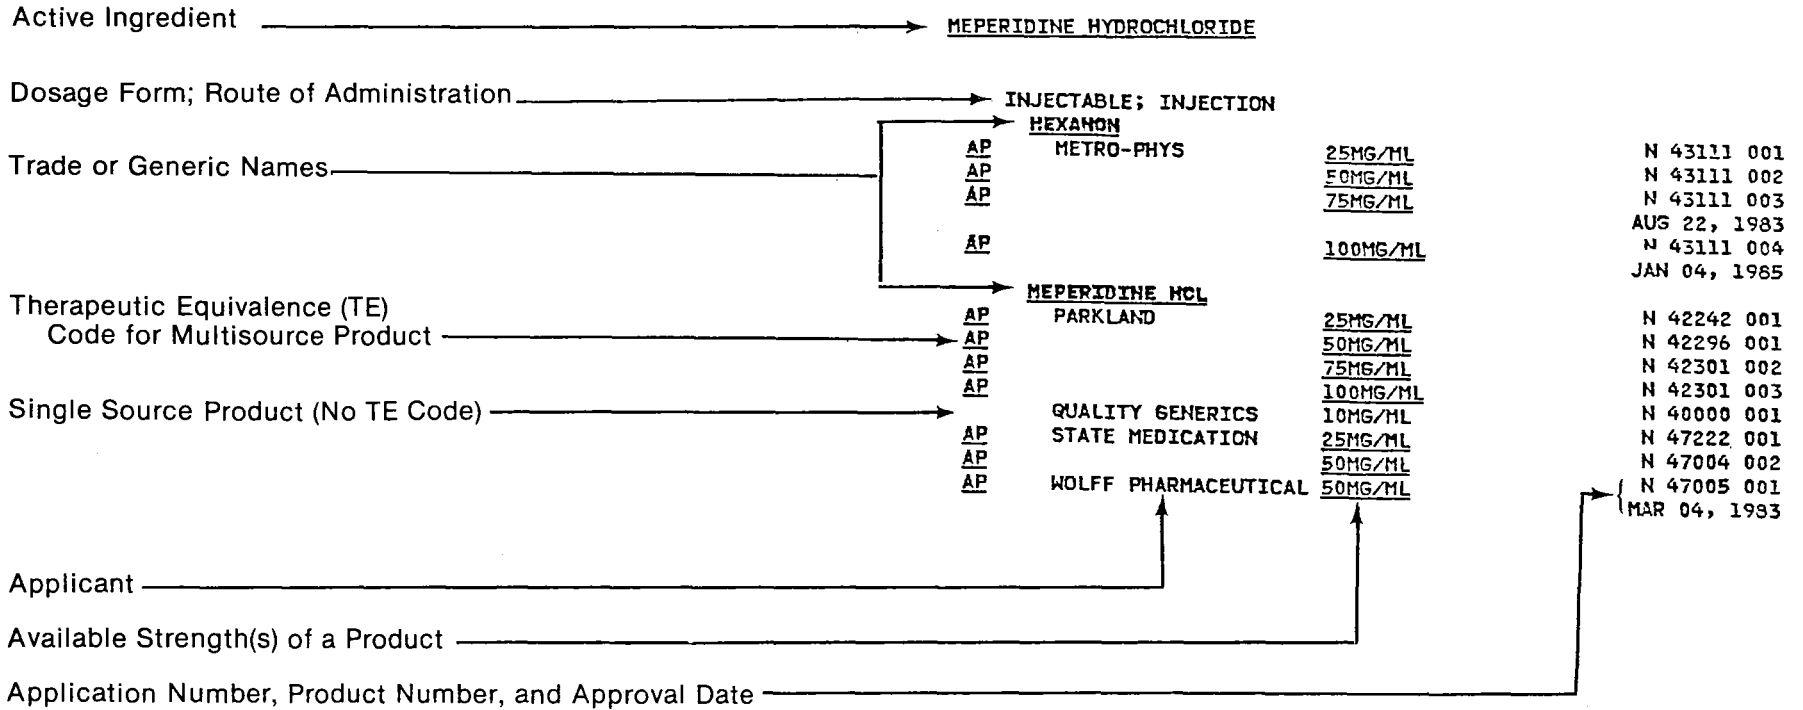

Product Name Index Listed by Applicant (Prescription and OTC Drug Product Lists). This is an index that cross-references applicants to products. The second term of each entry indicates the first alphabetically arranged ingredient under which product information can be found in the appropriate Drug Product List. OTC products are so designated.

Applicant Name Abbreviations. This is a list of the applicant name abbreviations used in this publication.

Uniform Terms. In order to improve readability, uniform terms are used to designate dosage forms, routes of administration, and abbreviations used to express strengths. These terms are listed in *Appendix D*. In some cases, the terms used may differ from those used in product labels and other labeling.

2.2 DRUG PRODUCT ILLUSTRATION

Single Ingredient

2.2

Multiple Ingredients

With Product Information

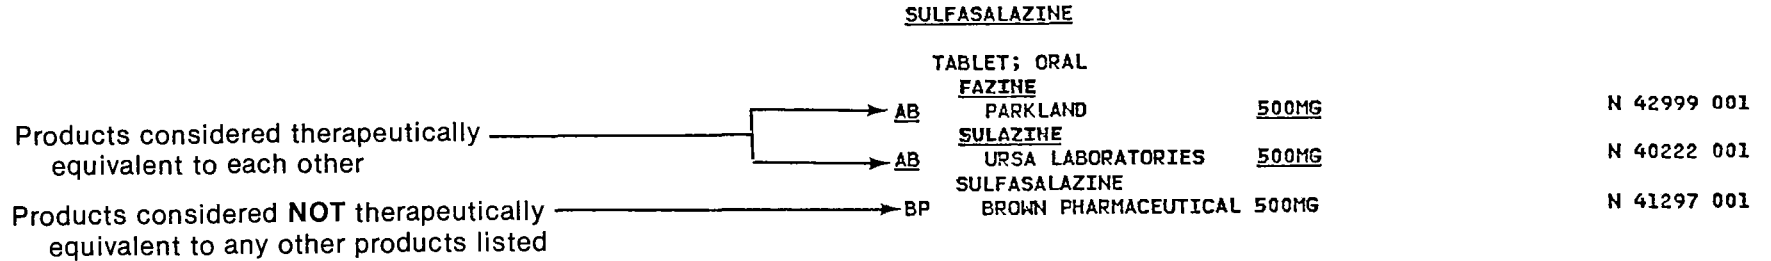

With Cross-Reference

This example is for purposes of illustration only. It does not represent actual products from the Prescription Drug Product list.

2.3 THERAPEUTIC EQUIVALENCE EVALUATIONS ILLUSTRATION

Drug products coded **AB** (or any code beginning with an "A") under an ingredient and dosage form heading are considered therapeutically equivalent only to other products coded **AB** (or any code beginning with an "A") and **NOT** to those coded **BP** (or any code beginning with a "B") and any products not listed. Drug products coded **BP** (or any code beginning with a "B") are **NOT** considered therapeutically equivalent to any other product. For a complete explanation of the TE codes refer to Section 1.5 of the *Introduction*.

NOTE: Bold font and underlining denotes multisource products which are considered therapeutically equivalent.

This example is for purposes of illustration only. It does not represent actual products from the Prescription Drug Product list.

ORPHAN DRUG PRODUCTS WITH EXCLUSIVE APPROVAL

3-283

SECTION 526 OF THE FEDERAL FOOD, DRUG, AND COSMETIC ACT CONTAINS PROVISIONS WHEREBY FDA MAY DESIGNATE A SPONSOR'S DRUG, ANTIBIOTIC, OR BIOLOGICAL PRODUCT AS A 'DESIGNATED ORPHAN DRUG'. SECTION 527 OF THE ACT ESTABLISHES A PROCESS WHEREBY A SPONSOR MAY RECEIVE SEVEN YEARS OF EXCLUSIVE APPROVAL STATUS IF THAT SPONSOR IS THE FIRST TO ACHIEVE NEW DRUG, ANTIBIOTIC, OR BIOLOGICAL PRODUCT APPROVAL FOR A DESIGNATED ORPHAN DRUG FOR THE DESIGNATED INDICATION(S). THE EXCLUSIVE APPROVAL MAY BE REVOKED BY WRITTEN CONSENT OF THE SPONSOR OR BY FDA ACTION AFTER FINDING THAT THE SPONSOR HOLDING EXCLUSIVE APPROVAL CANNOT ASSURE THE AVAILABILITY OF SUFFICIENT QUANTITIES OF THE DRUG TO MEET THE NEEDS OF PATIENTS WITH THE DESIGNATED ORPHAN INDICATION(S).

ORPHAN DRUG EXCLUSIVE APPROVAL STATUS (CODED ODE) APPLIES ONLY TO THE APPROVED OR LICENSED INDICATION(S) FOR WHICH ORPHAN DRUG DESIGNATION HAS BEEN GRANTED PURSUANT TO SECTION 526 OF THE ACT.

FOR THE FOLLOWING DRUG PRODUCTS WITH ORPHAN DRUG EXCLUSIVE APPROVAL STATUS, THE SPONSOR HAS SEVEN YEARS OF EXCLUSIVE APPROVAL FOR THE APPROVED INDICATION BEGINNING ON THE DATE OF NDA, ANTIBIOTIC APPLICATION, OR BIOLOGICAL LICENSE APPROVAL FOR THE DRUG. NO SUBSEQUENT SPONSOR MAY RECEIVE APPROVAL OF AN NDA,

BIOLOGICAL LICENSE, PAPER NDA, ANTIBIOTIC APPLICATION, ANDA, OR ABBREVIATED ANTIBIOTIC APPLICATION DURING THE SEVEN YEAR PERIOD FOR THE DRUG AND INDICATION(S) FOR WHICH A PERSON MAINTAINS ODE STATUS UNLESS THE EXCLUSIVE APPROVAL HAS BEEN REVOKED AS DESCRIBED ABOVE OR THE SUBSEQUENT SPONSOR HAS OBTAINED WRITTEN CONSENT FROM THE SPONSOR WHO HAS RECEIVED EXCLUSIVE APPROVAL.

BIOLOGICAL PRODUCTS, ANTIBIOTICS, AND DRUGS THAT HAVE BEEN APPROVED UNDER SECTION 505 OR 507 OF THE ACT OR UNDER SECTION 351 OF THE PUBLIC HEALTH SERVICE ACT FOR MARKETING AND HAVE BEEN GIVEN ORPHAN DRUG EXCLUSIVE APPROVAL WILL BE NOTED BY THE ABBREVIATION ODE IN THE PATENT AND EXCLUSIVITY DATA APPENDIX. DRUG PRODUCTS THAT HAVE RECEIVED THE WRITTEN PERMISSION OF THE SPONSOR THAT HAS ORPHAN DRUG EXCLUSIVE APPROVAL TO BE APPROVED UNDER SECTION 527(B)(2) OF THE ACT ARE ALSO NOTED BY THE ABBREVIATION ODE IN THE PATENT AND EXCLUSIVITY DATA APPENDIX. THESE DRUG PRODUCTS DO NOT HAVE ANY EXCLUSIVE APPROVAL RIGHTS OF THEIR OWN, BUT CAN BE MARKETED BECAUSE OF THE CONSENT GIVEN BY THE SPONSOR THAT HAS EXCLUSIVE APPROVAL. THESE PRODUCTS ARE MARKED BY AN (*) NEXT TO THE APPLICANT'S NAME.

ANDA SUITABILITY PETITIONS

3-288

THE FOLLOWING ARE TWO LISTS OF PETITIONS FILED UNDER SECTION 505(J)(2)(C) OF THE ACT WHERE THE AGENCY HAS DETERMINED THAT THE REFERENCED PRODUCT: (1) IS SUITABLE FOR SUBMISSION AS AN ANDA (PETITIONS APPROVED) AND (2) IS NOT SUITABLE FOR SUBMISSION AS AN ANDA (PETITIONS DENIED). THE DETERMINATION THAT AN ANDA WILL BE APPROVED IS NOT MADE UNTIL THE ANDA ITSELF IS SUBMITTED AND REVIEWED BY THE AGENCY. A COPY OF EACH PETITION IS LISTED BY DOCKET NUMBER ON PUBLIC DISPLAY IN FDA'S DOCKETS MANAGEMENT BRANCH, HFA-305, ROOM 4-62, 5600 FISHERS LANE, ROCKVILLE, MD 20857.

DIAZEPAM, DIAZEPAM
DICYCLOMINE HCL, DICYCLOMINE HYDROCHLORIDE
DIMENHYDRINATE, DIMENHYDRINATE
DIPHENHYDRAMINE HCL, DIPHENHYDRAMINE HYDROCHLORIDE

APPENDIX B
PRODUCT NAME INDEX LISTED BY APPLICANT

B-13

DURA-LUTIN, HYDROXYPROGESTERONE CAPROATE
EDETATE DISODIUM, EDETATE DISODIUM
ESTRADIOL CYPIONATE, ESTRADIOL CYPIONATE
ESTRADIOL VALERATE, ESTRADIOL VALERATE
ESTRONE, ESTRONE
FLUOROURACIL, FLUOROURACIL
FUROSEMIDE, FUROSEMIDE
GENTAMICIN SULFATE, GENTAMICIN SULFATE
GLYCOPYRROLATE, GLYCOPYRROLATE
HEPARIN LOCK FLUSH, HEPARIN SODIUM
HEPARIN SODIUM, HEPARIN SODIUM
HYDROCORTISONE ACETATE, HYDROCORTISONE ACETATE
HYDROCORTISONE SODIUM SUCCINATE, HYDROCORTISONE SODIUM
SUCCINATE
HYDROXOCOBALAMIN, HYDROXOCOBALAMIN
HYDROXYZINE HCL, HYDROXYZINE HYDROCHLORIDE
IRON DEXTRAN, IRON DEXTRAN COMPLEX
KANAMYCIN SULFATE, KANAMYCIN SULFATE
LIDOCAINE HCL, LIDOCAINE HYDROCHLORIDE
LIDOCAINE HCL W/ EPINEPHRINE, EPINEPHRINE
MANNITOL 25%, MANNITOL
MEPIVACAINE HCL, MEPIVACAINE HYDROCHLORIDE
MERSALYL-THEOPHYLLINE, MERSALYL SODIUM
METHOCARBAMOL, METHOCARBAMOL
METHYLPREDNISOLONE ACETATE, METHYLPREDNISOLONE ACETATE
METHYLPREDNISOLONE SODIUM SUCCINATE, METHYLPREDNISOLONE
SODIUM SUCCINATE
METRONIDAZOLE, METRONIDAZOLE
NANDROLONE DECANOATE, NANDROLONE DECANOATE
NANDROLONE PHENPROPIONATE, NANDROLONE PHENPROPIONATE
NATURAL ESTROGENIC SUBSTANCE-ESTRONE, ESTRONE
NEO-OTOSOL-HC, HYDROCORTISONE
NEOMYCIN AND POLYMYXIN B SULFATES, NEOMYCIN SULFATE
NEOMYCIN AND POLYMYXIN B SULFATES AND DEXAMETHASONE,
DEXAMETHASONE
NEOMYCIN AND POLYMYXIN B SULFATES AND HYDROCORTISONE,
HYDROCORTISONE
NEOMYCIN SULFATE-DEXAMETHASONE SODIUM PHOSPHATE,
DEXAMETHASONE SODIUM PHOSPHATE
ORPHENADRINE CITRATE, ORPHENADRINE CITRATE
PHENYTOIN SODIUM, PHENYTOIN SODIUM
PREDNISOLONE ACETATE, PREDNISOLONE ACETATE
PREDNISOLONE TEBUTATE, PREDNISOLONE TEBUTATE
PROCAINAMIDE HCL, PROCAINAMIDE HYDROCHLORIDE
PROCAINE HCL, PROCAINE HYDROCHLORIDE
PROGESTERONE, PROGESTERONE

PROMAZINE HCL, PROMAZINE HYDROCHLORIDE
PROMETHAZINE HCL, PROMETHAZINE HYDROCHLORIDE
PYRIDOXINE HCL, PYRIDOXINE HYDROCHLORIDE
SOLU-PRED, PREDNISOLONE SODIUM PHOSPHATE
TESTOSTERONE, TESTOSTERONE
TESTOSTERONE CYPIONATE, TESTOSTERONE CYPIONATE
TESTOSTERONE CYPIONATE-ESTRADIOL CYPIONATE, ESTRADIOL
CYPIONATE
TESTOSTERONE ENANTHATE, TESTOSTERONE ENANTHATE
TESTOSTERONE ENANTHATE-ESTRADIOL VALERATE, ESTRADIOL VALERATE
TESTOSTERONE PROPIONATE, TESTOSTERONE PROPIONATE
THIAMINE HCL, THIAMINE HYDROCHLORIDE
TRIAMCINOLONE ACETONIDE, TRIAMCINOLONE ACETONIDE
TRIAMCINOLONE DIACETATE, TRIAMCINOLONE DIACETATE
TRIMETHOBENZAMIDE HCL, TRIMETHOBENZAMIDE HYDROCHLORIDE

CENTRAL PHARMS

ACETAMINOPHEN AND HYDROCODONE BITARTRATE, ACETAMINOPHEN
CO-GESIC, ACETAMINOPHEN
CODIMAL-L.A. 12, CHLORPHENIRAMINE MALEATE (OTC)
DEXACEN-4, DEXAMETHASONE SODIUM PHOSPHATE
PHENYLPROPANOLAMINE HCL W/ CHLORPHENIRAMINE MALEATE,
CHLORPHENIRAMINE MALEATE (OTC)
PREDNICEN-M, PREDNISONE
PREDNISOLONE ACETATE, PREDNISOLONE ACETATE
SYNOHYLATE, THEOPHYLLINE SODIUM GLYCINATE
THEOCLEAR L.A.-130, THEOPHYLLINE
THEOCLEAR L.A.-260, THEOPHYLLINE
THEOCLEAR-100, THEOPHYLLINE
THEOCLEAR-200, THEOPHYLLINE
THEOCLEAR-80, THEOPHYLLINE
THEOPHYLLINE, THEOPHYLLINE

CENTURY PHARMS

P.A.S. SODIUM, AMINOSALICYLATE SODIUM

CHAMBERLAIN PARENTERL

HEPARIN SODIUM, HEPARIN SODIUM

CHASE CHEMICAL

VITAMIN A, RETINOL
VITAMIN A, VITAMIN A PALMITATE
VITAMIN D, ERGOCALCIFEROL

CHELSEA LABORATORIES

ACETAMINOPHEN W/ CODEINE PHOSPHATE, ACETAMINOPHEN

APPENDIX B
PRODUCT NAME INDEX LISTED BY APPLICANT

B-14

ALLOPURINOL, ALLOPURINOL
AMINOPHYLLINE, AMINOPHYLLINE
AMITRIPTYLINE HCL, AMITRIPTYLINE HYDROCHLORIDE
BETHANECHOL CHLORIDE, BETHANECHOL CHLORIDE
BROMPHENIRAMINE MALEATE, BROMPHENIRAMINE MALEATE
BUTABARBITAL SODIUM, BUTABARBITAL SODIUM
BUTALBITAL W/ ASPIRIN AND CAFFEINE, ASPIRIN
CARISOPRODOL, CARISOPRODOL
CHLORDIAZEPOXIDE HCL, CHLORDIAZEPOXIDE HYDROCHLORIDE
CHLOROTHIAZIDE, CHLOROTHIAZIDE
CHLORPHENIRAMINE MALEATE, CHLORPHENIRAMINE MALEATE
CHLORPROMAZINE HCL, CHLORPROMAZINE HYDROCHLORIDE
CHLORPROPAMIDE, CHLORPROPAMIDE
CHLORTHALIDONE, CHLORTHALIDONE
CHLORZOXAZONE, CHLORZOXAZONE
CONJUGATED ESTROGENS, ESTROGENS, CONJUGATED
CORTISONE ACETATE, CORTISONE ACETATE
CYPROHEPTADINE HCL, CYPROHEPTADINE HYDROCHLORIDE
DEXAMETHASONE, DEXAMETHASONE
DIAZEPAM, DIAZEPAM
DICYCLOMINE HCL, DICYCLOMINE HYDROCHLORIDE
DIETHYLPROPION HCL, DIETHYLPROPION HYDROCHLORIDE
DIMENHYDRINATE, DIMENHYDRINATE
DIPHENHYDRAMINE HCL, DIPHENHYDRAMINE HYDROCHLORIDE
DIPHENOXYLATE HCL W/ ATROPINE SULFATE, ATROPINE SULFATE
DISOPYRAMIDE PHOSPHATE, DISOPYRAMIDE PHOSPHATE
DISULFIRAM, DISULFIRAM
DOXEPIN HCL, DOXEPIN HYDROCHLORIDE
DOXYCYCLINE HYCLATE, DOXYCYCLINE HYCLATE
ERGOLOID MESYLATES, ERGOLOID MESYLATES
ERYTHROMYCIN STEARATE, ERYTHROMYCIN STEARATE
FOLIC ACID, FOLIC ACID
FUROSEMIDE, FUROSEMIDE
GLUTETHIMIDE, GLUTETHIMIDE
GLYCOPYRROLATE, GLYCOPYRROLATE
HYDRALAZINE AND HYDROCHLOROTHIAZIDE, HYDRALAZINE HYDROCHLORIDE
HYDRALAZINE HCL, HYDRALAZINE HYDROCHLORIDE
HYDRALAZINE, HYDROCHLOROTHIAZIDE W/ RESERPINE, HYDRALAZINE
HYDROCHLORIDE
HYDROCHLOROTHIAZIDE, HYDROCHLOROTHIAZIDE
HYDROCHLOROTHIAZIDE W/ RESERPINE, HYDROCHLOROTHIAZIDE
HYDROFLUMETHIAZIDE, HYDROFLUMETHIAZIDE
HYDROGENATED ERGOT ALKALOIDS, ERGOLOID MESYLATES
HYDROXYZINE HCL, HYDROXYZINE HYDROCHLORIDE
HYDROXYZINE PAMOATE, HYDROXYZINE PAMOATE
IBUPROFEN, IBUPROFEN
IBUPROFEN, IBUPROFEN (OTC)
IMIPRAMINE HCL, IMIPRAMINE HYDROCHLORIDE
INDOMETHACIN, INDOMETHACIN
ISONIAZID, ISONIAZID
MECLIZINE HCL, MECLIZINE HYDROCHLORIDE
MEPROBAMATE, MEPROBAMATE
METHOCARBAMOL, METHOCARBAMOL
METHYCLOTHIAZIDE, METHYCLOTHIAZIDE
METHYLDOPA, METHYLDOPA
METHYLPREDNISOLONE, METHYLPREDNISOLONE
METOCLOPRAMIDE HCL, METOCLOPRAMIDE HYDROCHLORIDE
METRONIDAZOLE, METRONIDAZOLE
NIACIN, NIACIN
NITROFURANTOIN, NITROFURANTOIN
NYSTATIN, NYSTATIN
PERPHENAZINE AND AMITRIPTYLINE HCL, AMITRIPTYLINE
HYDROCHLORIDE
PHENDIMETRAZINE TARTRATE, PHENDIMETRAZINE TARTRATE
PHENTERMINE HCL, PHENTERMINE HYDROCHLORIDE
PHENYLBUTAZONE, PHENYLBUTAZONE
PHENYTOIN SODIUM, PHENYTOIN SODIUM, PROMPT
PREDNISOLONE, PREDNISOLONE
PREDNISON, PREDNISON
PROBEN-C, COLCHICINE
PROBENECID, PROBENECID
PROCAINAMIDE HCL, PROCAINAMIDE HYDROCHLORIDE
PROMETHAZINE HCL, PROMETHAZINE HYDROCHLORIDE
PROPOXYPHENE HCL, PROPOXYPHENE HYDROCHLORIDE
PROPOXYPHENE HCL W/ ASPIRIN AND CAFFEINE, ASPIRIN
PROPOXYPHENE NAPSYLATE AND ACETAMINOPHEN, ACETAMINOPHEN
PROPRANOLOL HCL, PROPRANOLOL HYDROCHLORIDE
PROPRANOLOL HCL AND HYDROCHLOROTHIAZIDE, HYDROCHLOROTHIAZIDE
PROPYLTHIOURACIL, PROPYLTHIOURACIL
PYRILAMINE MALEATE, PYRILAMINE MALEATE
QUINIDINE GLUCONATE, QUINIDINE GLUCONATE
QUINIDINE SULFATE, QUINIDINE SULFATE
RESERPINE, RESERPINE
SODIUM PENTOBARBITAL, PENTOBARBITAL SODIUM
SODIUM SECOBARBITAL, SECOBARBITAL SODIUM
SPIRONOLACTONE, SPIRONOLACTONE
SPIRONOLACTONE W/ HYDROCHLOROTHIAZIDE, HYDROCHLOROTHIAZIDE
SULFAMETHOXAZOLE AND TRIMETHOPRIM, SULFAMETHOXAZOLE
SULFASALAZINE, SULFASALAZINE
SULFISOXAZOLE, SULFISOXAZOLE
TETRACYCLINE HCL, TETRACYCLINE HYDROCHLORIDE
THIORIDAZINE HCL, THIORIDAZINE HYDROCHLORIDE

APPENDIX B
PRODUCT NAME INDEX LISTED BY APPLICANT

B-15

TOLAZAMIDE, TOLAZAMIDE
TOLBUTAMIDE, TOLBUTAMIDE
TRAZODONE HCL, TRAZODONE HYDROCHLORIDE
TRIAMCINOLONE, TRIAMCINOLONE
TRICHLORMETHIAZIDE, TRICHLORMETHIAZIDE
TRIPLENNAMINE HCL, TRIPLENNAMINE HYDROCHLORIDE
TRIPROLIDINE HCL AND PSEUDOEPHEDRINE HCL, PSEUDOEPHEDRINE
HYDROCHLORIDE (OTC)
VERAPAMIL HCL, VERAPAMIL HYDROCHLORIDE

CHESEBROUGH-PONDS

ACTIN-N, NITROFURAZONE
ULTRA DERM, SILVER SULFADIAZINE
VIRAC REX, UNDECOYLUM CHLORIDE

CIBA/CIBA-GEIGY

ANTRENYL, OXYPHENONIUM BROMIDE
ANTURANE, SULFINPYRAZONE
APRESAZIDE, HYDRALAZINE HYDROCHLORIDE
APRESOLINE, HYDRALAZINE HYDROCHLORIDE
APRESOLINE-ESIDRIX, HYDRALAZINE HYDROCHLORIDE
CIBACALCIN, CALCITONIN, HUMAN
CIBALITH-S, LITHIUM CITRATE
CYTADREN, AMINOGLUTETHIMIDE
DEFERAL MESYLATE, DEFEROXAMINE MESYLATE
ESIDRIX, HYDROCHLOROTHIAZIDE
ESIMIL, GUANETHIDINE MONOSULFATE
ESTRADERM, ESTRADIOL
HEAVY SOLUTION NUPERCALCINE, DIBUCAINE HYDROCHLORIDE
IMIPRAMINE HCL, IMIPRAMINE HYDROCHLORIDE
INH, ISONIAZID
ISMELIN, GUANETHIDINE MONOSULFATE
K-TIMEKAP, POTASSIUM CHLORIDE
LITHOBID, LITHIUM CARBONATE
LOCORTEN, FLUMETHASONE PIVALATE
LUDIOMIL, MAPROTILINE HYDROCHLORIDE
METANDREN, METHYLTESTOSTERONE
METOPIRONE, METYRAPONE
PERCORTEN, DESOXYCORTICOSTERONE ACETATE
PERCORTEN, DESOXYCORTICOSTERONE PIVALATE
PRISCOLINE, TOLAZOLINE HYDROCHLORIDE
REGITINE, PHENTOLAMINE MESYLATE
RIMACTANE, RIFAMPIN
RITALIN, METHYLPHENIDATE HYDROCHLORIDE
RITALIN-SR, METHYLPHENIDATE HYDROCHLORIDE
SER-AP-ES, HYDRALAZINE HYDROCHLORIDE

SERPASIL, RESERPINE
SERPASIL-APRESOLINE, HYDRALAZINE HYDROCHLORIDE
SERPASIL-ESIDRIX #1, HYDROCHLOROTHIAZIDE
SERPASIL-ESIDRIX #2, HYDROCHLOROTHIAZIDE
SLOW-K, POTASSIUM CHLORIDE
TEN-K, POTASSIUM CHLORIDE
TRANSERM-SCOP, SCOPOLAMINE
TRASICOR, OXPRENOLOL HYDROCHLORIDE

CINTICHEM

TECHNETIUM TC 99M GENERATOR, TECHNETIUM, TC-99M
GENERATOR/SODIUM PERTECHNETATE, TC-99M

CTS-US

AN-SULFUR COLLOID, TECHNETIUM, TC-99M, SULFUR COLLOID KIT

CLAY-PARK LABS

BETAMETHASONE VALERATE, BETAMETHASONE VALERATE
FLUOCINOLONE ACETONIDE, FLUOCINOLONE ACETONIDE
GENTAMICIN, GENTAMICIN SULFATE
HYDROCORTISONE, HYDROCORTISONE
NITROFURAZONE, NITROFURAZONE
NYSTATIN, NYSTATIN
NYSTATIN AND TRIAMCINOLONE ACETONIDE, NYSTATIN
TRIAMCINOLONE ACETONIDE, TRIAMCINOLONE ACETONIDE
TRIPLE SULFA, SULFABENZAMIDE

CM BUNNY

BUTABARBITAL, BUTABARBITAL SODIUM
DIPHENHYDRAMINE HCL, DIPHENHYDRAMINE HYDROCHLORIDE
MECLIZINE HCL, MECLIZINE HYDROCHLORIDE
PREDNISOLONE, PREDNISOLONE
PREDNISONE, PREDNISONE
RAUWOLFIA SERPENTINA, RAUWOLFIA SERPENTINA
RESERPINE, RESERPINE

COLMED LABORATORIES

ACETOHEXAMIDE, ACETOHEXAMIDE

INDOCIN SR, INDOMETHACIN

APPENDIX B
PRODUCT NAME INDEX LISTED BY APPLICANT

B-39

NOROXIN, NORFLOXACIN
PEPCID, FAMOTIDINE
TECHNETIUM TC 99M LIDOFENIN KIT, TECHNETIUM TC-99M LIDOFENIN
KIT
TIMOPTIC, TIMOLOL MALEATE
TIMOPTIC IN OCUDOSE, TIMOLOL MALEATE
VASERETIC, ENALAPRIL MALEATE

MURO PHARMACEUTICAL

LIQUID PRED, PREDNISONE
MURO'S OPCON, NAPHAZOLINE HYDROCHLORIDE
PRELONE, PREDNISOLONE
SULPHRIN, PREDNISOLONE ACETATE
SULTEN-10, SULFACETAMIDE SODIUM

MUTUAL PHARM

CHLORTHALIDONE, CHLORTHALIDONE
DOXYCYCLINE HYCLATE, DOXYCYCLINE HYCLATE
HYDRALAZINE HCL, HYDRALAZINE HYDROCHLORIDE
HYDROXYZINE HCL, HYDROXYZINE HYDROCHLORIDE
IBUPROFEN, IBUPROFEN
METRONIDAZOLE, METRONIDAZOLE
PREDNISONE, PREDNISONE
SPIRONOLACTONE, SPIRONOLACTONE
SULFAMETHOXAZOLE AND TRIMETHOPRIM, SULFAMETHOXAZOLE
THIORIDAZINE HCL, THIORIDAZINE HYDROCHLORIDE

MY-K LABS

AMINOPHYLLINE, AMINOPHYLLINE
BIPHETANE DC, BROMPHENIRAMINE MALEATE
BIPHETAP, BROMPHENIRAMINE MALEATE
BROMPHENIRAMINE MALEATE, BROMPHENIRAMINE MALEATE
BUTABARBITAL SODIUM, BUTABARBITAL SODIUM
CHLORPROMAZINE HCL, CHLORPROMAZINE HYDROCHLORIDE
CYPROHEPTADINE HCL, CYPROHEPTADINE HYDROCHLORIDE
DIPHEN, DIPHENHYDRAMINE HYDROCHLORIDE
DIPHEN, DIPHENHYDRAMINE HYDROCHLORIDE (OTC)
FLUOCINOLONE ACETONIDE, FLUOCINOLONE ACETONIDE
HALOPERIDOL, HALOPERIDOL LACTATE
HYDROCORTISONE, HYDROCORTISONE
HYDROXYZINE HCL, HYDROXYZINE HYDROCHLORIDE
LINDANE, LINDANE
LITHIUM CITRATE, LITHIUM CITRATE
MYAPAP W/ CODEINE, ACETAMINOPHEN
MYBANIL, BROMODIPHENHYDRAMINE HYDROCHLORIDE
MYCODONE, HOMATROPINE METHYLBROMIDE

MYFED, PSEUDOEPHEDRINE HYDROCHLORIDE (OTC)
MYIDYL, TRIPROLODINE HYDROCHLORIDE
MYLAMINE, DEXCHLORPHENIRAMINE MALEATE
MYLOCAINE, LIDOCAINE HYDROCHLORIDE
MYMETHASONE, DEXAMETHASONE
MYMETHAZINE FORTIS, PROMETHAZINE HYDROCHLORIDE
MYPHETANE DX, BROMPHENIRAMINE MALEATE
MYPROIC ACID, VALPROATE SODIUM
NYSTATIN, NYSTATIN
OXTRIPHYLLINE, OXTRIPHYLLINE
OXTRIPHYLLINE PEDIATRIC, OXTRIPHYLLINE
PROCHLORPERAZINE EDISYLATE, PROCHLORPERAZINE EDISYLATE
PROMETHAZINE DM, DEXTROMETHORPHAN HYDROBROMIDE
PROMETHAZINE PLAIN, PROMETHAZINE HYDROCHLORIDE
PROMETHAZINE VC PLAIN, PHENYLEPHRINE HYDROCHLORIDE
PROMETHAZINE VC W/ CODEINE, CODEINE PHOSPHATE
PROMETHAZINE W/ CODEINE, CODEINE PHOSPHATE
PSEUDODINE C, CODEINE PHOSPHATE
SELENIUM SULFIDE, SELENIUM SULFIDE
SODIUM POLYSTYRENE SULFONATE, SODIUM POLYSTYRENE SULFONATE
SULMEPRIM, SULFAMETHOXAZOLE
SULMEPRIM PEDIATRIC, SULFAMETHOXAZOLE
THEOPHYLLINE, THEOPHYLLINE
THIORIDAZINE HCL, THIORIDAZINE HYDROCHLORIDE
TRIAMCINOLONE ACETONIDE, TRIAMCINOLONE ACETONIDE
TRIFLUOPERAZINE HCL, TRIFLUOPERAZINE HYDROCHLORIDE
TRIMEPAZINE TARTRATE, TRIMEPAZINE TARTRATE

MYLAN PHARMS

ALLOPURINOL, ALLOPURINOL
AMITRIPTYLINE HCL, AMITRIPTYLINE HYDROCHLORIDE
AMOXICILLIN, AMOXICILLIN
AMPICILLIN TRIHYDRATE, AMPICILLIN/AMPICILLIN TRIHYDRATE
CHLORDIAZEPOXIDE AND AMITRIPTYLINE HCL, AMITRIPTYLINE
HYDROCHLORIDE
CHLORDIAZEPOXIDE HCL, CHLORDIAZEPOXIDE HYDROCHLORIDE
CHLOROTHIAZIDE, CHLOROTHIAZIDE
CHLOROTHIAZIDE-RESERPINE, CHLOROTHIAZIDE
CHLORPROPAMIDE, CHLORPROPAMIDE
CHLORTHALIDONE, CHLORTHALIDONE
CYPROHEPTADINE HCL, CYPROHEPTADINE HYDROCHLORIDE
DIAZEPAM, DIAZEPAM
DIPHENOXYLATE HCL W/ ATROPINE SULFATE, ATROPINE SULFATE
DISOPYRAMIDE PHOSPHATE, DISOPYRAMIDE PHOSPHATE
DOXEPIN HCL, DOXEPIN HYDROCHLORIDE
DOXYCYCLINE HYCLATE, DOXYCYCLINE HYCLATE

APPENDIX B
PRODUCT NAME INDEX LISTED BY APPLICANT

B-40

ERYTHROMYCIN STEARATE, ERYTHROMYCIN STEARATE
FLURAZEPAM HCL, FLURAZEPAM HYDROCHLORIDE
FUROSEMIDE, FUROSEMIDE
HALOPERIDOL, HALOPERIDOL
HYDRALAZINE HCL-HYDROCHLOROTHIAZIDE-RESERPINE, HYDRALAZINE
HYDROCHLORIDE
HYDROCHLOROTHIAZIDE, HYDROCHLOROTHIAZIDE
IBUPROFEN, IBUPROFEN
INDOMETHACIN, INDOMETHACIN
MAXZIDE, HYDROCHLOROTHIAZIDE
MECLOFENAMATE SODIUM, MECLOFENAMATE SODIUM
MEPROBAMATE, MEPROBAMATE
METHOCARBAMOL, METHOCARBAMOL
METHYLCLOTHIAZIDE, METHYLCLOTHIAZIDE
METHYLDOPA, METHYLDOPA
METHYLDOPA AND HYDROCHLOROTHIAZIDE, HYDROCHLOROTHIAZIDE
PENICILLIN G POTASSIUM, PENICILLIN G POTASSIUM
PENICILLIN V POTASSIUM, PENICILLIN V POTASSIUM
PROBENECID, PROBENECID
PROPANTHELINE BROMIDE, PROPANTHELINE BROMIDE
PROPOXYPHENE HCL, PROPOXYPHENE HYDROCHLORIDE
PROPOXYPHENE HCL W/ APAP, ACETAMINOPHEN
PROPOXYPHENE NAPSYLATE AND ACETAMINOPHEN, ACETAMINOPHEN
PROPRANOLOL, PROPRANOLOL HYDROCHLORIDE
RESERPINE, RESERPINE
SPIRONOLACTONE, SPIRONOLACTONE
SPIRONOLACTONE-HYDROCHLOROTHIAZIDE, HYDROCHLOROTHIAZIDE
TEMAZEPAM, TEMAZEPAM
TETRACYCLINE HCL, TETRACYCLINE HYDROCHLORIDE
THIORIDAZINE HCL, THIORIDAZINE HYDROCHLORIDE
TOLAZAMIDE, TOLAZAMIDE
TOLBUTAMIDE, TOLBUTAMIDE
TRIAMCINOLONE, TRIAMCINOLONE

** N **

HASKA PHARMACAL

DEXAMETHASONE, DEXAMETHASONE
DIPHENHYDRAMINE HCL, DIPHENHYDRAMINE HYDROCHLORIDE
NYSTATIN, NYSTATIN

NATCON

AMINOPHYLLINE, AMINOPHYLLINE
CYANOCOBALAMIN, CYANOCOBALAMIN
DEXAMETHASONE SODIUM PHOSPHATE, DEXAMETHASONE SODIUM PHOSPHATE
FUROSEMIDE, FUROSEMIDE

HEPARIN SODIUM, HEPARIN SODIUM
HYDROXYZINE HCL, HYDROXYZINE HYDROCHLORIDE
LIDOCAINE HCL, LIDOCAINE HYDROCHLORIDE
MANNITOL 25%, MANNITOL
PIPERAZINE CITRATE, PIPERAZINE CITRATE
POTASSIUM CHLORIDE, POTASSIUM CHLORIDE
PYRIDOXINE HCL, PYRIDOXINE HYDROCHLORIDE
THIAMINE HCL, THIAMINE HYDROCHLORIDE

NATL PHARM MFG/BARRE

ACETAMINOPHEN W/ CODEINE PHOSPHATE, ACETAMINOPHEN
ACETASOL, ACETIC ACID, GLACIAL
ACETASOL HC, ACETIC ACID, GLACIAL
AMINOPHYLLINE DYE FREE, AMINOPHYLLINE
APAP W/ CODEINE, ACETAMINOPHEN
BETAMETHASONE DIPROPIONATE, BETAMETHASONE DIPROPIONATE
BETAMETHASONE VALERATE, BETAMETHASONE VALERATE
BIOCYCLINE, TETRACYCLINE
BROMANATE, BROMPHENIRAMINE MALEATE
BROMANATE DC, BROMPHENIRAMINE MALEATE
BROMANATE DM, BROMPHENIRAMINE MALEATE
BROMANYL, BROMODIPHENHYDRAMINE HYDROCHLORIDE
BROMPHENIRAMINE MALEATE, BROMPHENIRAMINE MALEATE
BUTABARB, BUTABARBITAL SODIUM
CHLORPROMAZINE HCL, CHLORPROMAZINE HYDROCHLORIDE
CYPROHEPTADINE HCL, CYPROHEPTADINE HYDROCHLORIDE
DEXAMETHASONE, DEXAMETHASONE
EPINEPHRINE, EPINEPHRINE (OTC)
ERYTHROMYCIN, ERYTHROMYCIN
ERYTHROMYCIN ESTOLATE, ERYTHROMYCIN ESTOLATE
ERYTHROMYCIN ETHYLSUCCINATE, ERYTHROMYCIN ETHYLSUCCINATE
FLUOCINOLONE ACETONIDE, FLUOCINOLONE ACETONIDE
FLURANDRENOLIDE, FLURANDRENOLIDE
HALOPERIDOL, HALOPERIDOL LACTATE
HYDRAMINE, DIPHENHYDRAMINE HYDROCHLORIDE
HYDRAMINE, DIPHENHYDRAMINE HYDROCHLORIDE (OTC)
HYDROCODONE COMPOUND, HOMATROPINE METHYLBROMIDE
HYDROCORTISONE, HYDROCORTISONE
HYDROXYZINE HCL, HYDROXYZINE HYDROCHLORIDE
ISOETHARINE HCL, ISOETHARINE HYDROCHLORIDE
ISOETHARINE MESYLATE, ISOETHARINE MESYLATE
ISOPROTERENOL HCL, ISOPROTERENOL HYDROCHLORIDE
LIDOCAINE HCL VISCOUS, LIDOCAINE HYDROCHLORIDE
LINDANE, LINDANE
LOMANATE, ATROPINE SULFATE
METHDILAZINE HCL, METHDILAZINE HYDROCHLORIDE

APPENDIX B
PRODUCT NAME INDEX LISTED BY APPLICANT

B-41

NYSTATIN, NYSTATIN
PIPERAZINE CITRATE, PIPERAZINE CITRATE
PROCHLORPERAZINE, PROCHLORPERAZINE EDISYLATE
PROCHLORPERAZINE EDISYLATE, PROCHLORPERAZINE EDISYLATE
PROMETH, PROMETHAZINE HYDROCHLORIDE
PROMETH VC PLAIN, PHENYLEPHRINE HYDROCHLORIDE
PROMETH VC W/ CODEINE, CODEINE PHOSPHATE
PROMETH W/ CODEINE, CODEINE PHOSPHATE
PROMETH W/ DEXTROMETHORPHAN, DEXTROMETHORPHAN HYDROBROMIDE
SELENIUM SULFIDE, SELENIUM SULFIDE
SULFATRIM, SULFAMETHOXAZOLE
SULFATRIM PEDIATRIC, SULFAMETHOXAZOLE
THEOPHYLLINE, THEOPHYLLINE
THIORIDAZINE HCL, THIORIDAZINE HYDROCHLORIDE
TRIAFIN-C, CODEINE PHOSPHATE
TRIAMCINOLONE ACETONIDE, TRIAMCINOLONE ACETONIDE
TRIMEPRAZINE TARTRATE, TRIMEPRAZINE TARTRATE
TRIOFED, PSEUDOEPHEDRINE HYDROCHLORIDE (OTC)
TRIPLE SULFA, TRISULFAPYRIMIDINES
TRIPROLIDINE HCL, TRIPROLIDINE HYDROCHLORIDE

NEPHRON

BETA-2, ISOETHARINE HYDROCHLORIDE

NEUTRON PHARMS

BROMPHENIRAMINE MALEATE, BROMPHENIRAMINE MALEATE
CHLORPHENIRAMINE MALEATE, CHLORPHENIRAMINE MALEATE
DIPHENHYDRAMINE HCL, DIPHENHYDRAMINE HYDROCHLORIDE
TRILITRON, PSEUDOEPHEDRINE HYDROCHLORIDE

NIPPON KAYAKU

BLENOXANE, BLEOMYCIN SULFATE

NMC LABORATORIES

FLUCET, FLUCINOLONE ACETONIDE
GENTAMICIN SULFATE, GENTAMICIN SULFATE
HYMAC, HYDROCORTISONE
KENAC, TRIAMCINOLONE ACETONIDE
MYKACET, NYSTATIN
MYKINAC, NYSTATIN
SULNAC, SULFABENZAMIDE
VALNAC, BETAMETHASONE VALERATE

NORDISK

INSULIN INSULATARD NPH NORDISK, INSULIN SUSP ISOPHANE
PURIFIED PORK (OTC)

INSULIN NORDISK MIXTARD (PORK), INSULIN PURIFIED PORK (OTC)
VELOSULIN, INSULIN PURIFIED PORK (OTC)

NORDISK USA

INSULATARD NPH HUMAN, INSULIN SUSP ISOPHANE PURIFIED
SEMISYNTHETIC HUMAN (OTC)
VELOSULIN HUMAN, INSULIN SEMISYNTHETIC PURIFIED HUMAN (OTC)

NORWICH EATON/PRG

ALPHADERM, HYDROCORTISONE
BUPRENEX, BUPRENORPHINE HYDROCHLORIDE
DANTRIUM, DANTROLENE SODIUM
DIDRONEL, ETIDRONATE DISODIUM
DOPAR, LEVODOPA
DUVOID, BETHANECHOL CHLORIDE
FURACIN, NITROFURAZONE
FURADANTIN, NITROFURANTOIN
FUROXONE, FURAZOLIDONE
IVADANTIN, NITROFURANTOIN SODIUM
LABID, THEOPHYLLINE
MACRODANTIN, NITROFURANTOIN, MACROCRYSTALLINE
NYSERT, NYSTATIN
ORLEX, ACETIC ACID, GLACIAL
ORLEX HC, ACETIC ACID, GLACIAL
SARENIN, SARALASIN ACETATE

NOVOCOL CHEM MFG

ISOCAINE HCL, MEPIVACAINE HYDROCHLORIDE
ISOCAINE HCL W/ LEVONORDEFRIN, LEVONORDEFRIN
OCTOCAINE, EPINEPHRINE

NOVOPHARM

METHYLDOPA, METHYLDOPA

** O **

OHM LABORATORIES

IBUPROFEN, IBUPROFEN
IBUPROFEN, IBUPROFEN (OTC)
IBUPROHM, IBUPROFEN

OPTOPTICS

OCUSULF-10, SULFACETAMIDE SODIUM
OCUSULF-30, SULFACETAMIDE SODIUM
OPTOMYCIN, CHLORAMPHENICOL
PARACAINE, PROPARACAINE HYDROCHLORIDE

APPENDIX B
PRODUCT NAME INDEX LISTED BY APPLICANT

B-42

SULFACEL-15, SULFACETAMIDE SODIUM
TROPICAMIDE, TROPICAMIDE

ORGANICS

CORTICOTROPIN, CORTICOTROPIN

ORGANON/AKZONA

CORTROPHIN-ZINC, CORTICOTROPIN-ZINC HYDROXIDE
CORTROSYN, COSYNTROPIN
DECA-DURABOLIN, NANDROLONE DECANOATE
DOCA, DESOXYCORTICOSTERONE ACETATE
DURABOLIN, NANDROLONE PHENPROPIONATE
DURABOLIN-50, NANDROLONE PHENPROPIONATE
FUROSEMIDE, FUROSEMIDE
HEPARIN SODIUM, HEPARIN SODIUM
HEXADROL, DEXAMETHASONE
HEXADROL, DEXAMETHASONE SODIUM PHOSPHATE
LIQUAEMIN LOCK FLUSH, HEPARIN SODIUM
LIQUAEMIN SODIUM, HEPARIN SODIUM
LIQUAEMIN SODIUM PRESERVATIVE FREE, HEPARIN SODIUM
LIQUAMAR, PHENPROCOUMON
LYNORAL, ETHINYL ESTRADIOL
MAXIBOLIN, ETHYLESTRENOL
METHYLPREDNISOLONE, METHYLPREDNISOLONE SODIUM SUCCINATE
NORCURON, VECURONIUM BROMIDE
ORGATRAK, HYDROXYZINE HYDROCHLORIDE
PAVULON, PANCURONIUM BROMIDE
PREGNYL, GONADOTROPIN, CHORIONIC
PURIFIED CORTROPHIN GEL, CORTICOTROPIN
REGONOL, PYRIDOSTIGMINE BROMIDE
SUCCINYLCHOLINE CHLORIDE, SUCCINYLCHOLINE CHLORIDE
WIGRAINE, CAFFEINE
WIGRETTES, ERGOTAMINE TARTRATE

ORTHO PHARMACEUTICAL

CLODERM, CLOCORTOLONE PIVALATE
DIENESTROL, DIENESTROL
ERYCETTE, ERYTHROMYCIN
GRIFULVIN V, GRISEOFULVIN, MICROCRYSTALLINE
MECLAN, MECLOCYLINE SULFOSALICYLATE
MICRONOR, NORETHINDRONE
MODICON 21, ETHINYL ESTRADIOL
MODICON 28, ETHINYL ESTRADIOL
MONISTAT 3, MICONAZOLE NITRATE
MONISTAT 7, MICONAZOLE NITRATE
MONISTAT-DERM, MICONAZOLE NITRATE

ORTHO-NOVUM 1/35-21, ETHINYL ESTRADIOL
ORTHO-NOVUM 1/35-28, ETHINYL ESTRADIOL
ORTHO-NOVUM 1/50 21, MESTRANOL
ORTHO-NOVUM 1/50 28, MESTRANOL
ORTHO-NOVUM 1/80 21, MESTRANOL
ORTHO-NOVUM 10-21, MESTRANOL
ORTHO-NOVUM 10/11-21, ETHINYL ESTRADIOL
ORTHO-NOVUM 10/11-28, ETHINYL ESTRADIOL
ORTHO-NOVUM 2-21, MESTRANOL
ORTHO-NOVUM 7/14-21, ETHINYL ESTRADIOL
ORTHO-NOVUM 7/14-28, ETHINYL ESTRADIOL
ORTHO-NOVUM 7/7/7-21, ETHINYL ESTRADIOL
ORTHO-NOVUM 7/7/7-28, ETHINYL ESTRADIOL
ORTHO-NOVUM 1/80 28, MESTRANOL
PROTOSTAT, METRONIDAZOLE
RETIN-A, TRETINOIN
SALPIX, ACETRIZOATE SODIUM
SPECTAZOLE, ECONAZOLE NITRATE
SULTRIN, SULFABENZAMIDE

OWEN LABS/DERM PRODS

CETACORT, HYDROCORTISONE
CROTAN, CROTAMITON
DESOWEN, DESONIDE
LOCOID, HYDROCORTISONE BUTYRATE
NUTRACORT, HYDROCORTISONE
SANSAC, ERYTHROMYCIN

** p **

PADDOCK LABORATORIES

BACITRACIN, BACITRACIN
ERYTHROMYCIN, ERYTHROMYCIN
HYDROCORTISONE, HYDROCORTISONE
NEOMYCIN SULFATE, NEOMYCIN SULFATE
NYSTATIN, NYSTATIN
POLYMXIN B SULFATE, POLYMXIN B SULFATE

PARRAY/ORMOHT DRUG

AMINOPHYLLINE, AMINOPHYLLINE
CHLORPHENIRAMINE MALEATE, CHLORPHENIRAMINE MALEATE
CINNASIL, RESCINNAMINE
CORTISONE ACETATE, CORTISONE ACETATE
HYDROCORTISONE, HYDROCORTISONE
ISONIAZID, ISONIAZID
KOGLUROID, RAUWOLFIA SERPENTINA

APPENDIX B
PRODUCT NAME INDEX LISTED BY APPLICANT

B-43

PARASAL, AMINOSALICYLIC ACID
PARASAL SODIUM, AMINOSALICYLATE SODIUM
PREDNISOLONE, PREDNISOLONE
PREDNISON, PREDNISON
PROCAPAN, PROCAINAMIDE HYDROCHLORIDE
SERPANRAY, RESERPINE
THEOLIXIR, THEOPHYLLINE

PAR PHARMACEUTICAL

ALLOPURINOL, ALLOPURINOL
AMILORIDE HCL, AMILORIDE HYDROCHLORIDE
AMITRIPTYLINE HCL, AMITRIPTYLINE HYDROCHLORIDE
BENZTROPINE MESYLATE, BENZTROPINE MESYLATE
BROMPHENIRAMINE MALEATE, BROMPHENIRAMINE MALEATE
CHLORPROPAMIDE, CHLORPROPAMIDE
CHLORZOXAZONE, CHLORZOXAZONE
CLONIDINE HCL, CLONIDINE HYDROCHLORIDE
CYPROHEPTADINE HCL, CYPROHEPTADINE HYDROCHLORIDE
DEXAMETHASONE, DEXAMETHASONE
DIAZEPAM, DIAZEPAM
DISULFIRAM, DISULFIRAM
DOXYCYCLINE HYCLATE, DOXYCYCLINE HYCLATE
FLURAZEPAM HCL, FLURAZEPAM HYDROCHLORIDE
HALOPERIDOL, HALOPERIDOL
HYDRA-ZIDE, HYDRALAZINE HYDROCHLORIDE
HYDRALAZINE HCL, HYDRALAZINE HYDROCHLORIDE
HYDRO-RIDE, AMILORIDE HYDROCHLORIDE
HYDROFLUMETHIAZIDE, HYDROFLUMETHIAZIDE
HYDROFLUMETHIAZIDE AND RESERPINE, HYDROFLUMETHIAZIDE
HYDROXYZINE HCL, HYDROXYZINE HYDROCHLORIDE
HYDROXYZINE PAMOATE, HYDROXYZINE PAMOATE
IBUPROFEN, IBUPROFEN
IBUPROFEN, IBUPROFEN (OTC)
IMIPRAMINE HCL, IMIPRAMINE HYDROCHLORIDE
INDOMETHACIN, INDOMETHACIN
LORAZEPAM, LORAZEPAM
MECLIZINE HCL, MECLIZINE HYDROCHLORIDE
MEPROBAMATE AND ASPIRIN, ASPIRIN
METHOCARBAMOL, METHOCARBAMOL
METHYLCLOTHIAZIDE, METHYLCLOTHIAZIDE
METOCLOPRAMIDE HCL, METOCLOPRAMIDE HYDROCHLORIDE
METRONIDAZOLE, METRONIDAZOLE
NYSSTATIN, NYSSTATIN
PERPHENAZINE AND AMITRIPTYLINE HCL, AMITRIPTYLINE
HYDROCHLORIDE
PROPANTHELINE BROMIDE, PROPANTHELINE BROMIDE

PROPRANOLOL HCL, PROPRANOLOL HYDROCHLORIDE
SULFAMETHOPRIM, SULFAMETHOXAZOLE
SULFAMETHOPRIM-DS, SULFAMETHOXAZOLE
SULFINPYRAZONE, SULFINPYRAZONE
THIORIDAZINE HCL, THIORIDAZINE HYDROCHLORIDE
TOLAZAMIDE, TOLAZAMIDE
TRICHLORMETHIAZIDE, TRICHLORMETHIAZIDE
VALPROIC ACID, VALPROIC ACID

PARKE-DAVIS LABS/W-L

LOESTRIN FE 1.5/30, ETHINYL ESTRADIOL

cants amending or supplementing applications with patent information are asked to certify that the patent(s) refers to an approved product or one for which approval is being sought.

The Agency is required by the Act to publish all use patents, even if the use has not been approved by the Agency. Therefore, the publication of a use patent in this Addendum in no way confers Agency approval on the indication covered by that patent or implies that the indication has been approved. The Agency has also asked all applicants or application holders of such patents to provide information as to the indications covered by such patents. This information will be included in the Supplement to the List as it becomes available.

Title I of the Act does not include products approved under Section 507 of the Federal Food, Drug, and Cosmetic Act (antibiotic products). Therefore, (1) antibiotic products are not considered eligible for exclusivity

protection, (2) holders of approved applications for antibiotic products need not submit the patent information as required of NDA application holders, and (3) antibiotic new drug application sponsors are not required to provide the patent certification statement which must be included in ANDAs.

However, Title II, the patent term restoration portion of the Act, specifically includes antibiotic, non-antibiotic, and human biological products (as those terms are used in the Federal Food, Drug, and Cosmetic Act and the Public Health Service Act) in its provisions.

This section is arranged in alphabetical order by active ingredient. For an explanation of the codes used in the Addendum, see the Exclusivity Terms page.

Since all parts of this publication are subject to changes, additions, or deletions, the Addendum must be used in conjunction with the most current Cumulative Supplement.

PATENT AND EXCLUSIVITY INFORMATION ADDENDUM

This Addendum identifies drugs which qualify under the Drug Price Competition and Patent Term Restoration Act of 1984 for periods of exclusivity (during which ANDAs and applications described in Section 505(b)(2) of the Act for those drugs may not be submitted or made effective as identified below) and provides patent information concerning the listed drugs. Exclusivity prevents the submission or effective approval of ANDAs or applications described in Section 505(b)(2) of the Act. It does not prevent the submission or approval of a second full NDA. Applications qualifying for periods of exclusivity are:

- (1) A new drug application approved between January 1, 1982 and September 24, 1984, for a drug product all active ingredients (including any ester or salt of the active ingredient) of which had never been approved in any other application. Approval of an ANDA or an application described in Section 505(b)(2) of the Act for the same drug may not be *made effective* for a period of *ten years* from the date of the approval of the original application.
- (2) A new drug application approved after September 24, 1984, for a drug product all active ingredients (including any ester or salt of the active ingredient) of which had never been approved in any other new drug application. Generally, no subsequent ANDA or an application described in Section 505(b)(2) of the Act for the same drug may be *submitted* for a period of *five years* from the date of approval of the original application, except that such an application may be *submitted* after *four years* if it contains a certification that a patent claiming the drug is invalid or will not be infringed by the product for which approval is sought.
- (3) A new drug application approved after September 24, 1984, for a drug product involving an active ingredient (or any ester or salt of that active ingredient) that has been approved in an earlier new drug application and which includes reports of new clinical investigations (other than bioavailability studies). Such investigations must have been conducted or sponsored by the applicant or for which the applicant had a right of reference, and the investigations must have been essential to approval of the application. If these requirements are met, the approval of a subsequent ANDA or an application described in Section 505(b)(2) of the Act may not be *made effective* for the same

drug before the expiration of *three years* from the date of approval of the original application.

- (4) A supplement to a new drug application approved after September 24, 1984, which contains reports of new clinical investigations (other than bioavailability studies) essential to the approval of the supplement and conducted or sponsored by the applicant or to which the applicant had a right of reference. The approval of a subsequent application for a change approved in the supplement may not be *made effective* for *three years* from the date of approval of the original supplement.
- (5) A new drug application (or supplement to a new drug application) approved during the period from January 1, 1982 to September 24, 1984, which includes an active ingredient (including any ester or salt of the active ingredient) that has been approved in another application. The approval of a subsequent application for the drug or a significant change made in a supplement could not have been *made effective* for *two years* from September 24, 1984. Exclusivity for drug products in this category has been removed from the List in this Edition, because such exclusivity has now expired.

The Act required approved new drug applications to be supplemented with the required patent information by October 24, 1984. Patent information must now be filed with all newly submitted drug applications, and no NDA may be approved after September 24, 1984, without the pertinent patent information. The patent numbers and the expiration dates of appropriate patents claiming drugs that are the subject of approved NDAs will be published in this Addendum or in the monthly Cumulative Supplement to this publication. Patent information on unapproved applications or on patents beyond the scope of the Act (i.e., process or manufacturing) will not be published.

The patents that FDA regards as covered by the statutory provisions for submission of patent information are: patents that claim the active ingredient or ingredients, drug product patents, which include formulation/composition patents (but exclude process patents) and use patents for a particular indication or method of using the product. To ensure that only appropriate patents are published, the Agency has an obligation to carefully screen the patent information that is submitted by the NDA holder. Therefore, NDA holders or appli-

EXCLUSIVITY TERMS
